Note: Numbers may not total 100% where some voter groups are not shown.

How the poll was conducted: The Times Poll interviewed 3,444 voters as they left 60 polling places across California during voting hours Tuesday. Precincts were chosen based on the pattern of turnout in past statewide elections. The survey was by a confidential, self-administered questionnaire in English and Spanish. The margin of sampling error for percentages based on the entire sample is plus or minus 2 percentage points; for some subgroups the error margin may be somewhat higher. Because the survey does not include absentee voters or those who declined to participate when approached, actual returns and demographic estimates by the interviewers were used to adjust the sample slightly. Interviews at the precinct level were conducted by Davis Research of Calabasas.
